CHICAGO GRAIN MARKET.

By JOSEPH F. PRITCHARD.

Chicago, Oct. 27.—The weight of the new crop of corn is being felt. The producers are willing to accept present prices for this grain, and were it possible to secure adequate care in which to make shipments the receipts at Western markets would show a large gain.

There were fractional declines in the price of corn today, December losing 8; to % cents and the May ¼ to % cents. The sales of the cash articles here were small at 30,000 bushels and these transactions would have been much larger had the corn been available. Receipts for the week were \$50,000 bushels less than the corresponding time last year and the shipments were \$1,200,000 bushels in the shipments were \$1,200,000 bushels will be shan the corresponding time last year and the shipments were \$1,200,000 bushels will be \$1,000 bushels for export. The country was reported selling cash oats more freely.

Provisions were unsettled and irregular and mainly higher. There was some loss in the values late on the weakness shown by the various grains.

The Merchants Who Are Already Doing Their Bit Saving Delivery Costs to Their Patrons

The Government has called upon the Merchants of the country to economize in their deliveries and save, through this economy. Man-powen Machines, Gasoline, Rubber, Etc., all of which are vital necessities in the prosecution of the war.

The Joint Committee of Consumers has asked us to make this saving through their co-operation in the carrying of packages, and request that they be allowed a discount equivalent to the saving in the cost of As Merchants herein represented we wish to call attention to the fact that we are now complying with the request of the Government by co-operating in their delivery through a Clearing-house system.

We are also complying with the request of the Joint Committee of Consumers, as they are now receiving the full benefit of the saving in the cost of delivery through the prices quoted on merchandise which we handle, and they also have the advantage of a satisfactory delivery

We are able to maintain our delivery service at a cost of approximately one-half of one per cent as against private delivery services costing the consumer from two to four per cent on total sales, as estimated by the Council of National Defense.

We are doing a patriotic duty and at the same time giving our patrons the advantage of the saving effected, and if we were to go even further and give them the actual cost of delivery as a rebate the amount saved would be too negligible to estimate.
